

*Water in the Climate Conference – how do we understand the water and climate nexus?*

Wednesday 13 October, 1:00 – 2:15pm AEDT, via Zoom

Time	Description
1:00 - 1:10	<b>Introductions</b> Michael Wilson, CEO, Australian Water Partnership (AWP) Tamerlaine Beasley, Beasley Intercultural
1:10 - 1:20	<b>Setting the scene: Water in the IPCC report</b> Professor Scott B. Power, Dip. Ed. Director, Centre for Applied Climate Sciences, USQ Adjunct Professor, School of Earth, Atmosphere and Environment, Monash University Associate Investigator, ARC Centre of Excellence for Climate Extremes.
1:20 - 1:30	<b>Breakout rooms</b> <i>How have you seen or experienced climate change in your work?</i>
1:30 - 1:45	<b>Discussion</b> Tamerlaine Beasley, Beasley Intercultural
1:45 - 2:00	<b>Breakout rooms</b> <i>What stories should be told about water and climate in the Indo Pacific?</i>
2:00 - 2:15	<b>Group feedback, summary and close</b> Tamerlaine Beasley

**Description:** This is a participatory session where we will learn the latest climate change findings and the implications/net consequences to water. Then, in breakout rooms, we will explore the diverse way in which climate and water links are understood. Input will help AWP to frame our thinking for our participation in the COP26 Conference in Glasgow in November. What does the Australian water and climate for development community think are the main issues?

**Pre-read/watch:** [AWP Webinar: Managing the impacts of climate change on water security](#)
